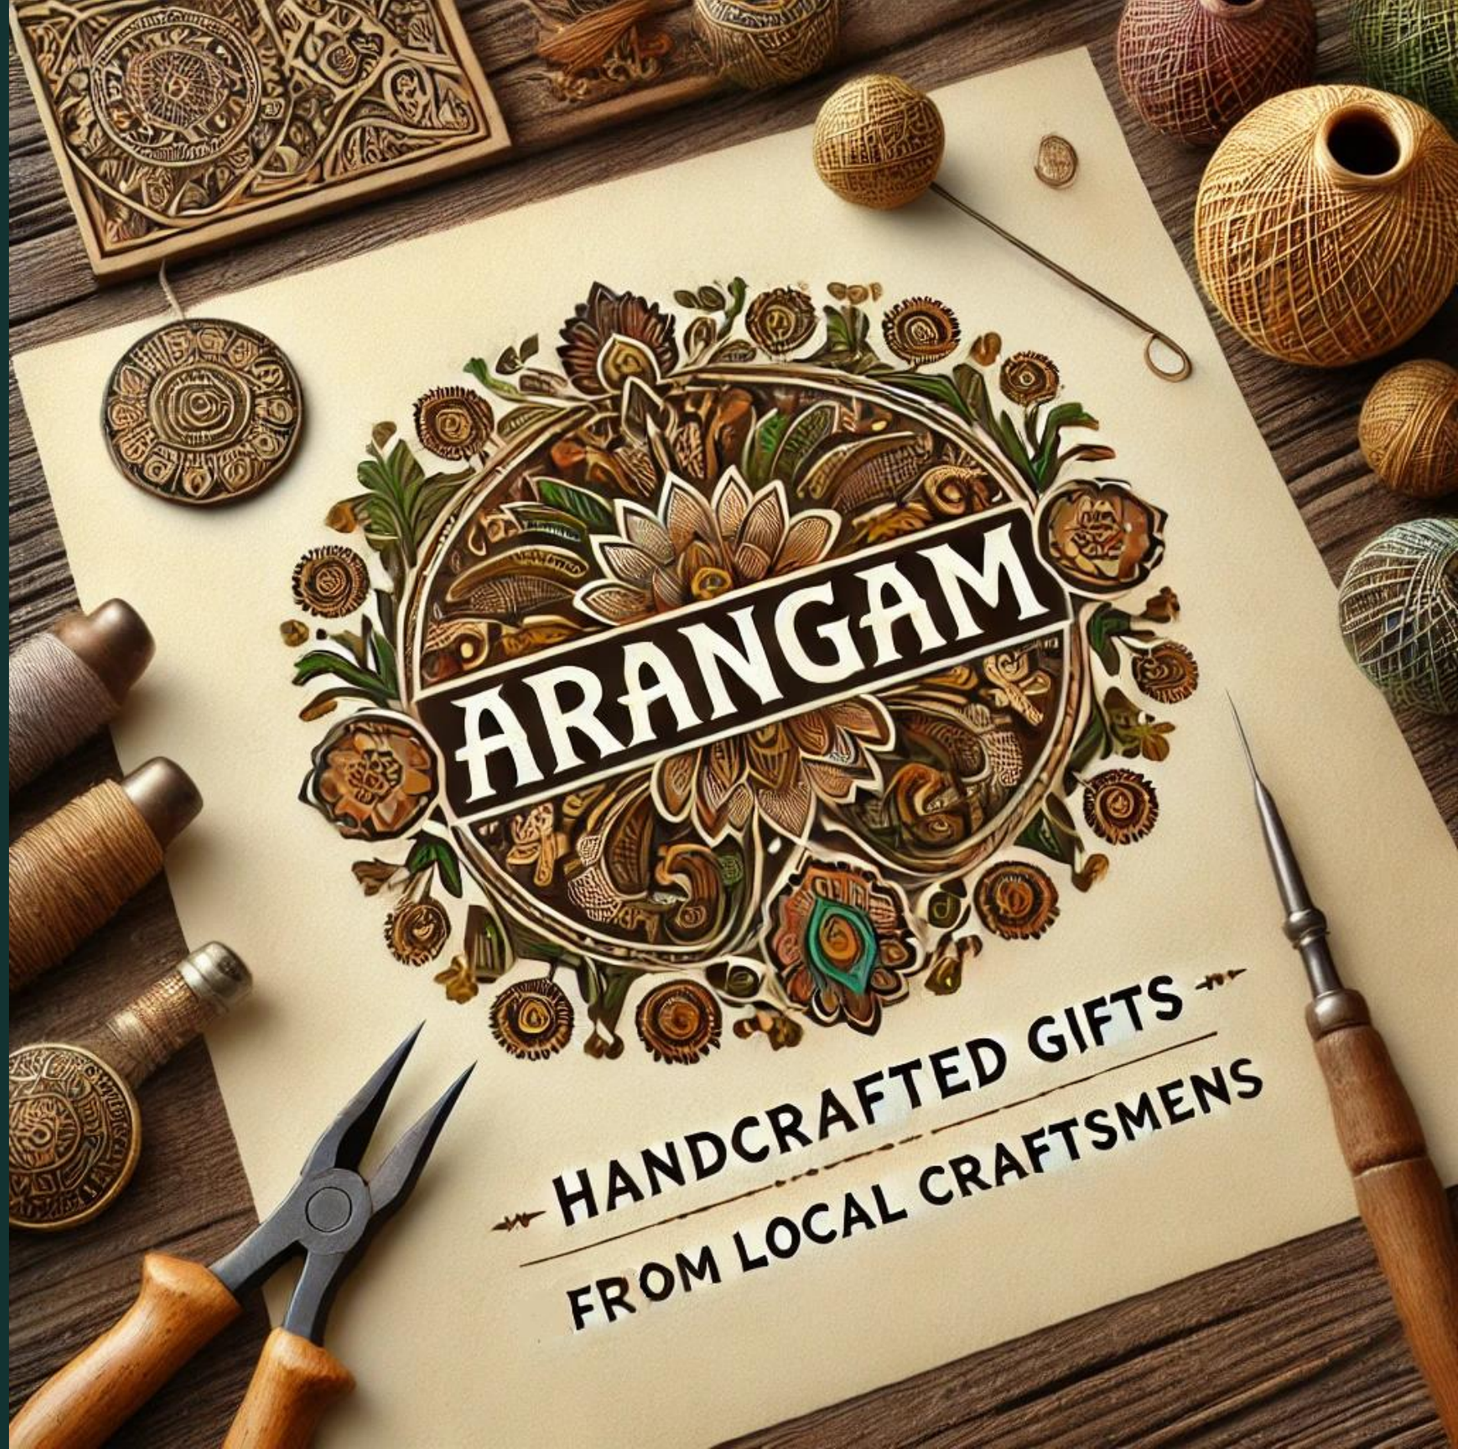
ARANGAM



The Problem: Lack of Market Access for Rural Artisans

There currently exists no platform that directly connects rural artisans with urban consumers who desire personalized, handcrafted products. Additionally, these artisans lack integration with government entities that could support their growth and formalization.

Income Instability

Only 34% of Indian artisans have access to mainstream markets, leaving 66% struggling to find buyers with majority earning earn below ₹5,000 per month.

Personalization

80% of consumers are more likely to make a purchase when brands offer personalized experiences which can be easily delivered through piece production by them.

Untapped Potential

Less than 1% of handloom weavers and craftsmen currently sell their products online, indicating a significant gap in e-commerce participation.

Our Solution: A Personalized, Handcrafted Gift Platform which Caters to Premium Urban Audience

Artisan Empowerment

Hindcraft provides a dedicated platform for artisans to showcase and sell their crafts.

Personalized Gifts

Urban consumers can create unique, handcrafted gifts tailored to special occasions.

Strategic Partnerships

Partner with government entities to provide artisans with the resources and support needed to formalize and scale their production.

Sustainable Impact

Hindcraft will promote ethical sourcing and supports rural communities.

Massive Market Opportunity in Handcrafted Gifts

1 Growing Demand

The global handicrafts market was valued at approximately USD 678.24 billion in 2022 and is projected to grow at a CAGR of 4.7%, reaching around USD 983.12 billion by 2030

2 Sustainability Trend

The Indian gifting market is valued at approximately $30 billion as of 2023, with projections indicating it could reach $84 billion by 2024, contributing significantly to the global gifting market, which is valued at $475 billion.

3 Massive Impact

The handicraft sector directly employs over 7 million artisans, according to the Ministry of Textiles. Some estimates suggest that the actual number could be as high as 200 million when considering informal and unorganized artisans across the country.

4 Consumer Preferences

Consumers are increasingly seeking products that reflect their values and individuality, leading to a rise in demand for handmade goods

5 E-commerce Growth

The rise of e-commerce presents a significant opportunity for Hindcrafts to reach broader markets. the pandemic has accelerated digital transformation in retail.

6 Regional Insights

The Asia Pacific region dominated the handicrafts market with a share of about 34.16% in 2022, driven by high production levels in countries like India, China, and Bangladesh

Proof of Concept

1

On-Ground Research with Artisans and Consumers
We interviewed craftsmen at the Magalir Thittam Department and various malls in Bangalore, identifying challenges in market access and validation of personalized products.

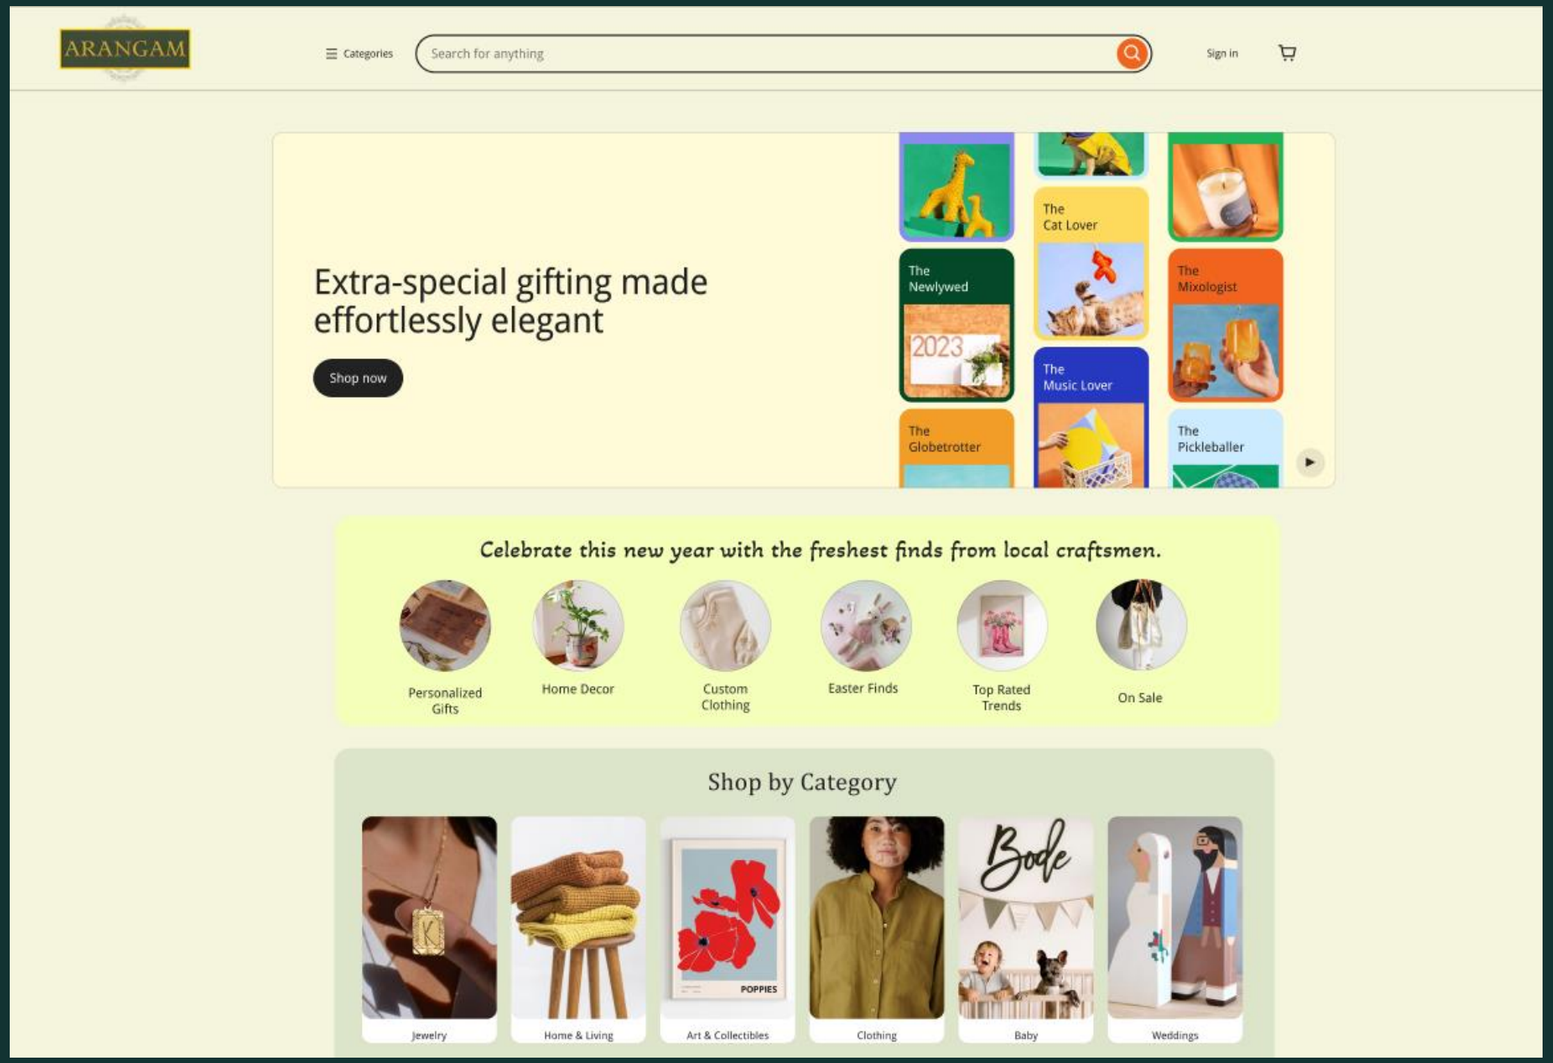
2

Validating Market Gaps through First-Hand Interactions
Discussions with urban consumers and artisans revealed the strong demand for personalized handicrafts, currently underserved by mainstream retail channels.

3

Partnerships with Regional Cooperatives
We discussed for collaboration with Regional Cooperatives, ensuring a reliable and scalable source of personalized handcrafted products.

The Platform Another e-commerce website but smartly crafted!



This platform will enable us to drive sales for the rural craftsmen through a managing body which controls the admin panel of product categories. They will be responsible for managing the process of co-creation with the user in case he intends to.

The price will keep changing dynamically as per availability, demand and craftsmen effort / costs for personalizing it. We will have a base amount on which will be displayed to give the user an idea of the final price.

It is observed for gifting/ handicrafts website, the major traffic is on collection page with very high bounce rate. We would replace the concept of conventional PDPs with customization pages in product category making the funnel more efficient.

Analyzing the Competitive Landscape and Advantage

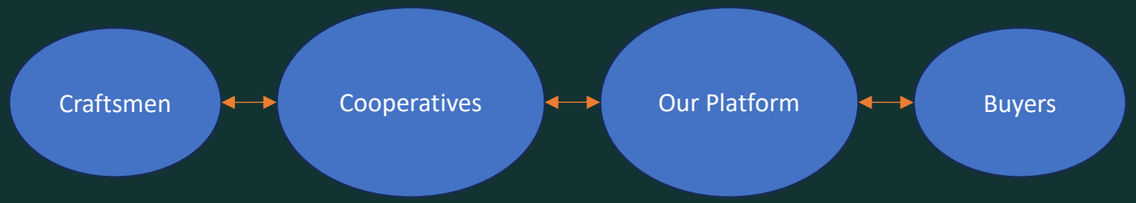
iTokri	No Personalization	Limited artisan representation	No co-creation experience
Jaypore	No Personalization	Focus on Premium Audience	No artisan representation
Etsy	Generic gift options	More toward global Audience	Not focused on Indian Craft
Govt eMarketplace	No Personalization	Focused on General Audience	Lacks proper branding

Competitive Advantages:

- Personalized Co-creation Experience
- Social Impact and Transparency
- Government Integration and Artisan Empowerment
- Niche Focus on Gifting and Customization
- Utilizing Technology for Rural Artisans
- Omnichannel Approach

Go-to-Market Strategy

Partnerships with Government Bodies and NGOs



We have started looking for collaborations with various Cooperative and NGOs and have got some positive responses by now.

Digital Marketing and E-commerce Optimization

We will use e-commerce platform and sales optimization techniques to iterate and drive the initial set of sales through platform.

Customer Experience and Trust Building

Once we have got enough traction, we would utilize branding the craftsman and user stories to brand ourselves through social media.
